

HydraForce, Inc.

Environmental Policy

HydraForce is a manufacturer of High Performance Hydraulic Cartridge Valves and Electro-Hydraulic Control Systems.

Our company mission is to provide our customers with the highest quality products and the most responsive customer support in the world, at a globally competitive price, while being environmentally responsible.

Our Environmental Management System (EMS) is committed to the design and manufacture of products using processes that reduce or prevent pollution and other fugitive emissions to the environment.

We are dedicated to life cycle thinking and are steadfast in our development and design of products and processes in an environmentally conscious manner that minimizes the consumption of natural resources.

Established environmental goals, objectives and targets are continually improved upon using internal and external assessments and reviews.

As an environmentally responsible employer and citizen of the world, we are committed to recycle or reuse materials, reduce waste generation, and to maintain a safe and healthy workplace for all employees and outside visitors.

Our Environmental Policy will be communicated to all HydraForce employees, to our suppliers, and to our outside contractors and published externally to the public or any other interested parties.
