

New Tamper-Proof Cap Options for RVD58-20 Relief Valves

The RVD58-relief valve is available with a range of pressure settings to accommodate a wide variety of hydraulic control applications. The A option is used to order RVD58-20 with the adjustable pressure setting. (See TO ORDER graphic below).

For factory-set valves, where the pressure setting is done by the HydraForce factory, Option C is used and the valve is shipped with a blue tamper-proof cap.

Our authorized distributors are now also able to set the pressure for RVD58-20 valves. Distributors who wish to do this should order the valves with the A option and put on their own tamper-proof cap.

Starting in January 2021, a new black tamper-proof cap will become available to distributors, to distinguish factory-set valves from the ones that have been pressure-set by authorized distributors. The new, black caps are ordered separately (Part No. 4618450).

If you have questions, please contact your HydraForce representative.

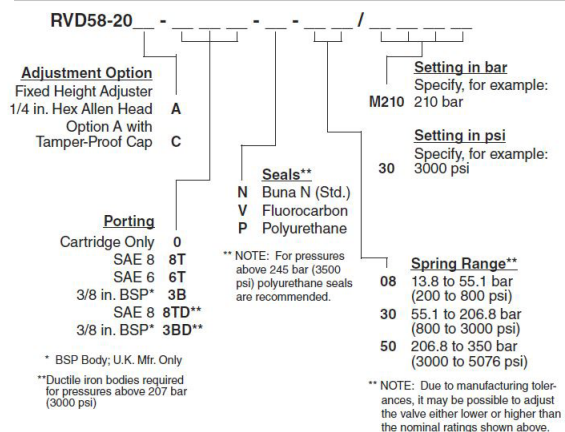

RVD58-20 with black cap
(pressure to be set by distributor)

RVD58-20 with blue cap
(Factory Set by HydraForce)
