

# Cartridge Valves - full range of solutions

## BOSCH REXROTH OIL CONTROL: THE FULL RANGE OF CARTRIDGE VALVE SOLUTIONS

### CUSTOMER BENEFITS

- Efficiency
- Flexibility of use
- Control
- Innovation
- Technology
- High quality standards
- Scraps reduction

Bosch Rexroth completes the range of cartridge valve solutions, designed to fit common industry (UNF) and market interchange cavities, optimized to suit the performance needs of the widest variety of mobile and industrial applications.

In particular, the counterbalance cartridge valve engineered for flow rates up to 480 l/min is the most innovative solution for mobile applications, such as drilling machines that work with high flow rates.

Bosch Rexroth Oil Control continues to invest to anticipate and always be forefront with competitive products, as requested by the global market.

Our production is marked out by control systems and automated assembly to achieve the target of increasing productivity, high quality standards and drastic scraps reduction.

With flexible systems, easy to manage and set, with laser controls and testing to respond in real time to the customers needs, Bosch Rexroth Oil Control develops innovative compact hydraulics solutions to be the first partner for equipment manufacturers.
