

## Overview

### Description

The CV12-20 is a screw-in, cartridge style, hydraulic check valve for use as a blocking or load-holding device.

### Operation

The CV12-20 allows flow passage from port 1 to port 2, while normally blocking oil flow in the opposite direction. The cartridge has a fully guided check which is spring-biased closed until sufficient pressure is applied at port 1 to open to port 2.

### Features

- Hardened seat for long life and low leakage.
- Optional bias springs for back-pressure application flexibility.
- Fully guided check assembly.
- Cost-effective cavity.
