

## Overview

### Description

FR50-28X is a screw-in, adjustable, pressure compensated, restrictive type with reverse flow check flow regulator cartridge valve.

### Operation

The valve opening increases from fully closed to fully open with counterclockwise adjustment rotation. With inlet at port 1 the FR50-28X valve will maintain preset flow rate from port 2 regardless of pressure variations in the circuit. The valve is intended for use with mineral based or synthetic fluids with lubricating properties.

### Features

- Hardened parts for long life.
- Quiet, modulated response.
- Industry-common cavity.
