

Overview

Description

A direct-acting, 3 position, 5 port, proportional, directional control, screw-in cartridge valve with position feedback. The valve is operated by a hydraforce ESDR controller where the command input to the esdr to operate the valve is via can wiring. The valve's spool position from neutral to fully shifted is monitored by the valve's lvdt coil to provide feedback signal voltage via Vout wiring to the ESDR for closed loop valve control. Port 1 is used as a load sense port.

Features

- Fast response time
- Low flow option for maximum resolution
- Integral load sensing
- Near zero hysteresis
- On-coil PID control with LVDT feedback
- Plug-and-play operation by CAN message
